

Fund Profile

At least half of the fund capital will be invested in listed shares on the exchanges of Ho Chi Minh City and Hanoi. At the most 20% of the fund can be invested in the Vietnamese OTC market. This depends on the liquidity of this market. The investment policy will be aimed at achieving high dividend income within the fund as well as capital growth. The risk profile is high, due to investments being channelled into frontier markets in Vietnam. The relationship between global financial markets and the Vietnamese markets is low, because the latter are less sensitive to international developments. To achieve its objective, the Fund invests 95% to 100% of its total assets through TCM Investment Funds Luxembourg in units of TCM Vietnam High Dividend Equity (Lux). The Fund qualifies as feeder-structure.

Trading

The fund is listed on Euronext, which means that the fund can be traded on trading days through any bank or broker. On trading days the fund will sell shares against NAV with a positive deviation of 0.5% and buy back against NAV with negative deviation of 0.5%.
